Structuring space into good neighbourhoods

Work has significantly changed in the last decade, but most office spaces have not. A balance between open and private spaces empowers employees to choose the best space for their needs. The more choice and control employees have over their work experience, the more

satisfied and engaged they are in their work. Share It Collection provides choice by structuring space into “good neighbourhoods:” places where individuals and teams feel comfortable to interact, share and focus.

88%

Percentage of highly engaged workers who have control over where and how they work in the office, depending on the task.

Steelcase Global Report: Engagement and the Global Workplace, 2016.

Share It Workstations

The center of the neighbourhood is the Share It Workstation, a place that welcomes users to an experience where their needs have been carefully considered. It features an integrated fixed-height desk or height-adjustable desk that encourages posture change, along with inviting light at the workstation, privacy for focused work, storage for personal items and areas to share information with others.

CHANGE POSTURES

Integration of height-adjustable desks allows a seamless transition between seated and standing work without leaving the workstation, which supports wellbeing within the neighbourhood.

PERSONAL STORAGE

Laterals, drawers and towers keep items within reach and provide the ability to lock and store devices and belongings. The open shelves provide space for storage or display.

COLLABORATE

Lounge seating with a whiteboard provides a comfortable space for quick collaboration or an area to focus away from the group.

Share It Collaborative Elements

Every neighbourhood needs an area where people can come together and create. Share It Collaborative Elements support teams within the open plan, allowing groups to share both analogue and digital information in a more private setting with an acoustic shroud.

Available in seated or standing height, with an integrated meeting table and lounge furniture at the back side, the Collaborative Element empowers workers with choice and control over where and how they work. Whiteboards and monitors make it easy to stay connected. Share content during a meeting or use it to quickly inform neighbourhood residents of updates and changes on a project.

Configuration Thought Starters

The perfect elements for a good neighbourhood.

The extensive statement of line of Share It Collection offers a wide range of possibilities. The following show a few of the configuration options.

SUSTAINABILITY

At its heart, sustainability at Steelcase is about people. It's about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential.

Research and insights direct our path. It's not only about creating goods, it's about creating good. It's not only about creating value, it's about living our values. It's not just about reducing our footprint, it's about expanding our reach. It's about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations.

Innovative products and solutions result. In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations.

Steelcase's sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.
