## Enhanced Choice. Advanced Performance.

Steelcase Series 2 is the attainable, high-performing task chair that you can personalize with extensive style choices. The backrest signals comfort, while the slim profile and light-scale look optimize any space. The back features an innovative geometric design that flexes in two dimensions to provide continuous support for your spine as you move.

## Highly Personalized Style

Style Steelcase Series 2 with standard or quilted upholstery. You can also celebrate the attractive geometric back design without upholstery or warm it up with 3D Microknit. Steelcase Series 2 is available as a standard-height task chair or as a higher stool. Add comfort and convenience with an optional headrest or coat hanger.

### AIR LIVEBACK™

Air LiveBack technology works through an innovative geometric design that provides sophisticated support. Breathable and transparent, the specially engineered wave pattern is scaled to provide appropriate support for each part of your spine. It flexes in two dimensions as you move to create responsive, personalized comfort and fit.

### HEIGHT-ADJUSTABLE LUMBAR

The optional height-adjustable lumbar provides additional back support, fitting comfortably in the curve of your back.

### RESPONSIVE BACK TENSION

The weight-activated back tension mechanism responds automatically as you sit to create appropriate ergonomic support – with three settings you can adjust for further comfort. The manually adjustable mechanism features 14 settings to provide the ultimate in personalized back tension. On both versions, seat and backrest stay synchronized for comfort as you recline.

### 4D ADJUSTABLE INDEPENDENT ARMRESTS

Armrests adjust in four dimensions – height, width, depth and pivot – to support neck and shoulders in postures right for work, even as you change tasks, move and collaborate. Armrests remain parallel to the worksurface at every angle of recline so you can stay on task.

### DYNAMIC SEAT

Adaptive seat bolstering conforms to your shape to create instant comfort. Seat depth adjusts to suit your position, and flexible seat edge makes room for movement.

## BACK STYLES
