MONTARA650 COLLECTION

Coalesse Design Group + Lievore Altherr Molina

coalesse®

Simple. Social. Refined.

Casual meetings at work can be the most productive. Yet casual seating tends to be uninspired. The Coalesse Design Group has collaborated with Spain's Lievore Altherr Molina to create a refined alternative. The Montara650 Collection is classically casual infused with comfort and craft. Its sculpted chairs, stools, rocker and lounge are paired with simple pedestal tables in multiple shapes and heights, and uniquely power-ready. Highly customisable, Montara650 fills informal spaces with café-style character tailored the way you want it. An inspired social solution for today's mobile workforce.

Seating in motion. The modern, sculpted form of the Montara650 Lounge becomes the basis of a new rocking chair.

Montara650 Seating

Stackable luxury.

Stackable doesn't have to be predictable. The Montara650 Chair is not an afterthought for short-term seating but a well thought-out solution for impromptu meetings. The sculpted oak-veneered plywood shell is comfortable on its own and more so with a seat cushion or fully upholstered. Warm and appealing, Montara650 is emotionally satisfying, a touch of luxury at an affordable price point.

Stackable seating. 4-leg and sled base chairs stack up to six high – offering a touch of luxury to a pragmatic workplace need.

Upholstery details. Dress seating up or down with multiple options ranging from all wood to fully upholstered shells – and a distinctive three-quarter upholstery detail.
Designed to customize.

Highly adaptable, the Montara650 Collection will fit with your existing assets or fill the vital social spaces of a new project. Tailor it to your style of work. The oak-faced shell is available in five subtle stains. It can be upholstered fully or in a unique three-quarter style that enhances comfort while maintaining the warmth of wood. Select from four legs or a sled base, with arms or armless, in trivalent chrome or painted to your palette. The sturdy, elegant Montara650 table is available in multiple heights and shapes and can be finished in any laminate or veneer. An optional PowerPod expands your application choices.

Table power. Optional PowerPod module brings power to the tabletop – on work, café or occasional tables. Charge your devices between meetings or during impromptu conversations.
