

Steelcase Power Hub

POWER TO WORK ANYWHERE

As more organizations recognize the importance of Agile — an iterative and rapid approach to work and the development of new ideas — individuals and teams are hacking spaces to fit their needs and seeking out alternative places to work. Now, a workspace can be anywhere with Steelcase Power Hub, a flexible, fast-charging and affordable solution that provides workers with one of the top desired amenities — power. With quick and easy access, and the ability to charge multiple devices at once, users can settle in and get to work anywhere in the office.

A recent Steelcase study of global office workers found that although 77 percent of people have their own assigned workstation, the vast majority — 87 percent — spend two to four hours every day working someplace else.

53% of workers say they can't find the spaces they need.

40% say they don't have enough informal spaces.

Basic with 2 power sockets
(EURO plug with French / Belgium and Schuko sockets, Swiss sockets and UK sockets)

2 Power sockets +
2 USB ports

Different fixing options are available: c-clamp, slatwall and integrated rail

SUTAINABILITY

Designing for the environment requires innovative thinking and solutions

At its heart, sustainability at Steelcase is about people. It's about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential. Research and insights direct our path. It's not only about creating goods, it's about creating good. It's not only about creating value, it's about living our values. It's not just about reducing our footprint, it's about expanding our reach. It's about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations. Innovative products and solutions result. In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations. Steelcase's sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.

SURFACE MATERIALS

- Body of product: Silver Aluminum
- The rest of the parts are Plastic Black + Black end caps
